

# Computer Labs and Workstations

Computer workstations are available in several areas on campus:

1. Stuart Hall, lab located on the lower level
2. [Library](#), workstations available on all floors
3. Adaptive Technology Room (Library Room 1102)\*

Labs are equipped with dual-boot Macs, running both macOS and Windows 10, with available [printers](#). Each operating system carries a standard software configuration with a variety of software titles. Computers are available 24/7, with the exception of computers within the Library, which are available during [normal library hours](#). Access to computers requires a login and password.

## **Please Be Advised**

These public workstations are designed to **not** save any information on them. If you log out, restart or shutdown without saving your work, that work is not retrievable and will be permanently lost. This policy is in place to ensure individual privacy when accessing these public machine. Be sure to save all work frequently to either external USB or Filr.

Here is additional information on the Seminary's Computer Labs and equipment available:

- [Adaptive Technology](#)
- [Hardware Specifications and Locations.](#)
- [Software Specifications.](#)
- [Using the High Speed Document Scanner \(Stuart Terminal 9\)](#)

\*The Adaptive Technology Room is designed for students with certain physical impairments, i.e. visual, dexterity, etc. Access to this room will require coordination with the Office of Student Life and Housing.
