

Webex

Princeton Theological Seminary has begun to standardize its web conference around the Cisco Webex platform. This platform allows Faculty, Students, Staff and Administration of the campus community to utilize Webex products for their web-conferencing needs.

The Webex Platform has two applications that user can take advantage of:

Webex Meetings - Video and web conferencing application. For more information about Webex Meeting, [click here](#).

Webex Teams - Collaborative workspace for individuals and teams. For more information about Webex Team, [click here](#).

Webex is being provided campus wide to all users by a site-license:

- Each campus user is provided with their own individual webex account - no additional account is required
- All Webex accounts will require a Princeton Theological Seminary email (firstname.lastname@ptsem.edu) and your Seminary password.
- You can access the Seminary Webex account login at: <https://ptsem.webex.com>
- Upon graduation, termination, or leaving the seminary, access to this account will be disabled.
