

Confluence Overview

What is Confluence?

Confluence is one place for all your team's work!

Spend less time hunting things down and more time making things happen. Organize your work, create documents, and discuss everything in one place.

To learn more visit: <https://www.atlassian.com/software/confluence>

Create

Create anything your team needs - meeting notes, product requirements, knowledge base articles - on the web so everyone can contribute.

Discuss

Give feedback on any Confluence page or file with inline and pinned comments. No more ridiculous file_names_with_dates.doc or messy track changes.

Centralize

Capture all the information that's scattered among email inboxes and countless apps in the same place.

Organize

Give every team, project, or department its own space to store work. Confluence keeps everything organized and accessible.
